Subject: TMX Wealth Client Fee Program

Dear OSC,

We appreciate the OSC asking us for our comment. Questrade is in favour of the TMX application for the proposed TMX Wealth Client Fee Cap Program. We like that this is an optional program that we can choose to take advantage of. We view that this program is a better option than the current requirements of having our clients declare "Pro" vs "Non-Pro" when they are using their on-line trading account for personal purposes. We appreciate the Enterprise program and this added option that allows us to offer real-time TMX data to a larger client base with a known fixed cost.

Thank you,

Regards,

Praneil Ladwa
