Preamble

Background

The OSC Service Commitment was established to provide investors, registrants, and market participants with transparency on the standards and timelines they can expect when interacting with the OSC. As part of our ongoing commitment to accountability and transparency, this quarterly report has been created to provide timely updates to stakeholders on our performance against these targets.

Performance Measurement

Each service standard has a corresponding performance target; this represents our commitment to the service level that stakeholders can expect when interacting with the OSC. The performance target generally applies for routine matters and assumes that applications and filings are received in an acceptable form. For more information on what this means, refer to the full OSC Service Commitment document on the OSC website.

Performance results against each standard are collected and presented on a quarterly basis for greater transparency.

Please note, since the OSC provided an updated Service Commitment last year, a number of new service standards were put into place. We have presented the data for these standards based on when we were able to adopt the new processes and implement tracking capabilities.

On December 7, 2021, in response to a significant and persistent increase in the volume and complexity of certain applications and filings, the OSC announced temporary changes to its service commitments which are effective until June 30, 2022. Performance results are measured against these temporary changes beginning on December 7, 2021. Where there is a temporary change to a service standard timeline or target the Q3 ’21-22 results are presented on a consolidated basis, measuring results based on the previous service standard for the period October 1, 2021 to December 6, 2021 and the temporary service standard for the period of December 7, 2021 to December 31, 2021. For more information, refer to the announcement on the OSC website.
In Q3 2021-22, staff continued to deliver at a high-level to our stakeholders while continuing to work remotely during the COVID-19 pandemic and continuing to face an increase in volumes related to our core regulatory operations. Overall, there were 40 service standards applicable for measurement this quarter, representing services requested. Where a service is not requested (e.g., no applications), the measurement is N/A and not included in the total number of service standards met/not met. Overall, for services requested, the OSC met or exceeded 85% (34 out of 40) of its quarterly performance targets in Q3 2021-2022. We have provided explanations for all standards that were not met.
