

We were just notified of the proposal of Bill NI 31-103.  
Speak about invasion of privacy!! What business is it  
of anyone other than yourself how you invest your income  
after the income taxes have been paid on it? Are we not  
still living in Canada and not in a communist country?  
Does the government want to legislate ALL of our decisions??  
What about the privacy laws? Criminals use them to the  
fullest extent to keep their records from exposure during  
a trial but people like us who are innocent of criminal actions  
are now to fully disclose any and all information to a sales  
person. That seems very discriminatory and illegal and we  
object to this bill.
