Subject: Comments on Changes to 43-101 Standards

A few comments that I would like to make;

- (1) I applaud the work that the CSA has done in revising the NI 43-101 Standards.
- (2) I am in agreement with the changes.
- (3) I am in particularly satisfied with changes to 43-101F1 table of Contents. The setting of ITEM 21,22 as separate items is particularly important to a Mining Engineer.
- (4) I am in agreement with the way Foreign Qualifications are treated.
- (5) Allowing the Firm to sign for a consultant that is no longer available with the same liabilities imposed just makes good sense.

I just wish I had more time to in detail list all of my comments.
