Dear Mr. Stevenson,

Thank you for allowing the general public to comment on next steps the OSC is considering taking with respect to Shareholder Democracy Issues.

It is my belief that is very desirable that the OSC Staff develop extensive proposals in this area. The scope of such proposals should be as wide as possible. This is an important area for the capital market in this country and a wide scope will allow for the greatest degree of discussion and input from all stakeholders. While I understand the trepidations of the OSC Staff to develop extensive and wide ranging proposals, I believe that the retail investor who does not have access to the resources of large institutional investors and managers, would greatly benefit from OSC Staff providing far-reaching proposals on these important issues.

Sincerely,
Baker Mavison
