CSA Staff Notice 23-324 Order Protection Rule: Market Share Threshold for the period April 1, 2019 to March 31, 2020

January 31, 2019

Introduction

On June 20, 2016, the Canadian Securities Administrators (the **CSA** or **we**) published a notice¹ (the **2016 Notice**) regarding the implementation of the market share threshold. This notice updates the list of protected and unprotected marketplaces published on January 25, 2018. The updated list will be in effect from April 1, 2019 to March 31, 2020. We note that there is one change from last year. Specifically, Aequitas NEO Exchange's lit book, NEO-L, has qualified as a marketplace that displays protected orders.

Purpose

The purpose of this notice is to provide the list of marketplaces that display protected orders (**protected marketplaces**) and marketplaces whose orders will not be protected (**unprotected marketplaces**) for the purposes of National Instrument 23-101 *Trading Rules* (**NI 23-101**) and the order protection rule (**OPR**) for the period April 1, 2019 to March 31, 2020 because they do not:

- (i) provide automated trading functionality as they have an intentional order processing delay, and/or
- (ii) meet the market share threshold.

The market share threshold has been set at 2.5%.²

¹ CSA Staff Notice 23-316 Order Protection Rule: Implementation of the Market Share Threshold and Amendments to Companion Policy 23-101 *Trading Rules*.

² CSA Staff Notice 23-316 includes a description of the calculation of the market share threshold.

OPR Requirements

Section 6.1 of NI 23-101 requires marketplaces to establish, maintain and ensure compliance with policies and procedures that are reasonably designed to prevent trade-throughs of better priced protected bids and offers. Section 6.4 of NI 23-101 imposes the same requirement on marketplace participants that assume responsibility for compliance with OPR by entering directed-action orders.

Section 1.1 of NI 23-101 defines protected bids and offers as bids and offers displayed on a marketplace offering automated trading functionality, and about which information is provided to an information processor.

Section 1.1.2.1 of Companion Policy 23-101 *Trading Rules* outlines the circumstances in which a marketplace that introduced an intentional order processing delay would not be considered to be providing automated trading functionality. In those circumstances, the orders on that marketplace would not be protected.

Orders on “dark” marketplaces are not protected as they are not displayed. Therefore, orders on ICX, LiquidNet, MATCHNow, Aequitas NEO dark book (NEO-D) and Nasdaq CXD are unprotected for the purposes of OPR.

List of Protected and Unprotected Marketplaces

Below we have listed the protected and unprotected marketplaces.

The orders displayed on the marketplaces listed in Table 1 below are protected because either the marketplace meets the market share threshold and/or the orders are for securities that are listed by and traded on that marketplace:
